PARTICULATE RESPIRATOR N95

FIT AND USE INSTRUCTIONS

WARNING Read and understand all safety warnings, instructions, illustrations and specifications provided. Failure to follow all instructions may result in sickness or death. Save all warnings and instructions for future reference.

This respirator protects the user by keeping certain dusts and particles out of the nose, mouth and lungs. For more information, contact Corporate After Sales Service Technical Support at 1-800-SAWDUST (1.800.729.3878) or at www.milwaukeetool.com.

N95-NIOSH Certified. At least 95% filtration efficiency against solid and liquid aerosols that do not contain oil. This respirator contains no components made from natural rubber latex.

For best results, use in well-ventilated areas. If you become fatigued, if you detect unascertained odors or vapors, or if you develop any signs of airway irritation, this respirator may be used only until the "USE BY" date on the package.

WARNING: Follow all Use and Limitations instructions. Before occupational use of this respirator, a written respiratory protection program must be implemented meeting all the local government requirements. In the United States, employers must comply with OSHA 29 CFR 1910.134 which includes medical evaluation, training, and fit testing. In Canada, CSA standard Z94.4 requirements must be met and/or requirements of the applicable jurisdiction, as appropriate.

This respirator:
- DOES filter particles such as those from grinding, sanding, sweeping, sawing, bagging, or processing minerals, coal, iron ore, flour, metal, pollen, and certain other substances. Hazardous particles can be too small to be seen by the naked eye.
- DOES protect from particles created from sprayed non-oil based liquids.
- DOES protect from sprays that do not also emit oil aerosols or vapors.
- DOES filter polen and mold spores*.
- DOES filter dust encountered during gardening, cutting firewood, raking, mowing, etc.
- IS designed for adults who are properly trained in its use and limitations.

This respirator:
- DOES NOT supply oxygen. Do not use in atmospheres containing less than 19.5% oxygen.
- DOES NOT filter gases, vapors, or odors.
- DOES NOT eliminate the inhalation of all particles.
- DOES NOT filter oil aerosols, asbestos**, lead, or sandblasting particles.
- DOES NOT eliminate the risk of disease, illness, or death.
- IS NOT for use in areas where there is not enough oxygen to breathe or where a high concentration of a toxic substance can occur.
- IS NOT for use where concentrations of contaminants are immediately dangerous to life and health.
- IS NOT for use where concentrations of contaminants are unknown.
- IS NOT for use where concentrations of contaminants exceed 10 times the permissible exposure limit (PEL) or according to specific OSHA standards or applicable government regulations, whichever is lower.
- IS NOT for use when OSHA substance specific standards, such as those for arsenic, cadmium, lead in construction industry, or 4,4'-methylene dianiline (MDA), specify other types of respiratory protection.
- DOES NOT prevent contaminants from entering your body through other routes such as skin, which would require additional personal protective equipment, such as gloves and other protective clothing.
- IS NOT for use with beards or other facial hair or other conditions that prevent a good seal between the face and the sealing surface of the respirator.
- SHOURL NOT be used if dirty, modified, or defective.
- SHOURL NOT be used if altered, abused or misused.
- IS NOT intended for use by individuals with a medical condition that might prevent the use of a respirator, such as asthma, emphysema or a history of heart disease. If you have such a condition consult your health care provider before use.
- IS NOT intended for medical use.

Storage/Shelf Life
Before use, keep respirator sealed in its original packaging and away from contaminants, dust, sunlight, extreme temperatures, excessive moisture and damaging chemicals. Store respirator away from contaminated areas when not in use. When properly stored within the temperature and humidity conditions specified below, the respirator may be used until the “USE BY” date specified on packaging.

Check with your local authorities for proper disposal of used respirators.

Use respirators before the “USE BY” date specified on packaging.

Storage Temperature Range
-20°C (+4°F) to +40°C (+104°F)

Storage Maximum Relative Humidity
Less than 80% RH
WARNING! If the respirator does not seal properly, DO NOT enter the contaminated area. A good fit ensures the air you breathe goes through the respirator. Follow these steps each time you wear the respirator.

1. Hold the respirator cupped in your hand, with the nosepiece at your fingertips, allowing the head straps to hang freely below your hand.
2. Position the respirator under your chin with the nose-piece up. Pull the straps over your head. Position the bottom strap around the neck below the ears. Position the top strap above the ears.
3. To adjust the straps, grasp the rings at the back and move the slider until a snug fit is achieved.
4. To form the nosepiece, use BOTH hands to form the nosepiece to your face, working outward from the bridge to the cheeks. If air leaks around the nosepiece using one hand, it may result in improper fit, causing the respirator to be less effective.
5. Check the fit by cupping both hands over the respirator and inhale sharply. - If air leaks around nosepiece, reform the nosepiece (see step 4). - If air leaks around the edges of the respirator, adjust the straps (see step 3).
6. To remove the respirator, cup one hand over the respirator and pull the straps over the head with the other hand.

WARNING! If you cannot achieve a proper seal, do not use the respirator. Restart fit instructions with a new respirator.

**Older homes and buildings may contain types of building products and insulation materials containing asbestos. Asbestos is toxic. If you think asbestos may be in your home, DO NOT touch or disturb the material as this may cause asbestos fibers to be released into the air. Repair or removal of asbestos-containing materials should only be done by a professional trained in the safe handling of asbestos. Contact the EPA at www.epa.gov for guidance on what to do if you suspect asbestos in your home.**

S-Special Instructions Section

50-73-4030 Air Purifying Filtering Facepiece N95 respirator has been manufactured by Venus Safety & Health Pvt. Ltd. for Milwaukee Electric Tool under TC-84A-9302

N95 - Particulate Filter (95% filter efficiency level) effective against particulate aerosols free of oil; time use restrictions may apply.

1. Protection:
   - Not for use in atmospheres containing less than 19.5% oxygen.
   - Not for use in atmospheres immediately dangerous to life or health.
   - Do not exceed maximum use concentrations established by regulatory standards.
   - Failure to properly use and maintain this product could result in injury or death.
   - All approved respirators shall be selected, fitted, used, and maintained in accordance with MSHA, OSHA, and other applicable regulations.
   - Never substitute, modify, add, or omit parts. Use only exact replacement parts in the configuration as specified by the manufacturer.
   - Refer to User's instructions, and/or maintenance manuals for information on use and maintenance of these respirators.
   - Never substitute, modify, add, or omit parts. Use only exact replacement parts in the configuration as specified by the manufacturer.
   - Refer to User's instructions, and/or maintenance manuals for information on use and maintenance of these respirators.
   - NIOSH does not evaluate respirators for use as surgical masks.
   - Special or critical User Instructions or specific use limitations apply. Refer to User Instructions before donning.
